

# The Switch is ON.

## The FCC mandate makes it easy to switch to Ritron's advantages.

Ritron's locomotive radio is a dedicated manufacturing effort by one company with more than 30 years of RF engineering design and production experience.

The combination of manufacturing know-how along with in-house mechanical, software and RF engineering skills work together to benefit our customers.

This advantage allows us to consistently deliver quality products, great logistical support, competitive pricing, and responsive technical assistance.
